

**Questo documento presenta una selezione della letteratura (ricerca di base e ricerca clinica) su MindLenses Professional e/o su aspetti del suo funzionamento, pubblicata da ricercatori affiliati a Restorative Neurotechnologies oppure da gruppi di ricerca indipendenti.**

**Tutti gli studi elencati riportano il link alla pubblicazione originale.**

## **INDICE**

Neuromodulazione con adattamento prismatico: meccanismi di base	<b>2</b>
Neuromodulazione con adattamento prismatico: neuroimmagini e neurofisiologia	<b>2</b>
Effetti clinici della neuromodulazione con adattamento prismatico	<b>3</b>
Pubblicazioni su MindLenses Professional o su parti del prodotto	<b>3</b>

### **Neuromodulazione con adattamento prismatico: meccanismi di base**

Magnani et al. (2011). Time and spatial attention: Effects of prism adaptation on temporal deficits in brain damaged patients. *Neuropsychologia*, 49, 1016–1023.

<http://dx.doi.org/10.1016/j.neuropsychologia.2010.12.014>

Magnani et al. (2013). The role of posterior parietal cortices on prismatic adaptation effects on the representation of time intervals. *Neuropsychologia*, 51, 2825–2832.

<http://dx.doi.org/10.1016/j.neuropsychologia.2013.08.006>

Frassinetti, F., Magnani, B., & Oliveri, M. (2009). Prismatic lenses shift time perception. *Psychological Science*, 20(8), 949-954. <https://doi.org/10.1111/j.1467-9280.2009.02390.x>

Oliveri et al. (2013). Prismatic adaptation effects on spatial representation of time in neglect patients. *Cortex*, 49(1), 120-130. <https://doi.org/10.1016/j.cortex.2011.11.010>

Bracco et al. (2018). Prismatic Adaptation Modulates Oscillatory EEG Correlates of Motor Preparation but Not Visual Attention in Healthy Participants. *The Journal of Neuroscience*, 38(5), 1189 –1201. <https://doi.org/10.1523/JNEUROSCI.1422-17.2017>

### **Neuromodulazione con adattamento prismatico: neuroimmagini e neurofisiologia**

Danckert, J., Ferber S., Goodale, M. A. (2008). Direct effects of prismatic lenses on visuomotor control: an event-related functional MRI study. *European Journal of Neuroscience*, 28(8), 696-1704. <http://dx.doi.org/10.1111/j.1460-9568.2008.06460.x>

Magnani et al. (2014). Prismatic Adaptation as a Novel Tool to Directionally Modulate Motor Cortex Excitability: Evidence From Paired-pulse TMS. *Brain Stimulation*, 7, 573-579. <http://dx.doi.org/10.1016/j.brs.2014.03.005>

Magnani et al. (2014). Left insular cortex and left SFG underlie prismatic adaptation effects on time perception: Evidence from fMRI. *NeuroImage*, 92, 340-348.

<http://dx.doi.org/10.1016/j.neuroimage.2014.01.028>

Oliveri et al. (2013). Prismatic adaptation effects on spatial representation of time in neglect patients. *Cortex*, 49(1), 120-130. <https://doi.org/10.1016/j.cortex.2011.11.010>

Bracco et al. (2017). Combining tDCS with prismatic adaptation for non-invasive neuromodulation of the motor cortex. *Neuropsychologia*, 101, 30-38.

<http://dx.doi.org/10.1016/j.neuropsychologia.2017.05.006>

### **Effetti clinici della neuromodulazione con adattamento prismatico**

Frassinetti, F., Angeli, V., Meneghelli, F., Avanzi, S., & Làdavas, E. (2002). Long-lasting amelioration of visuospatial neglect by prism adaptation. *Brain*, 125(3), 608-623.

<https://doi.org/10awf056.pdf3/brain/awf056>

Saj, A., Cojan, Y., Vocat, R., Luauté, J., & Vuilleumier, P. (2013). Prism adaptation enhances activity of intact fronto-parietal areas in both hemispheres in neglect patients. *Cortex*, 49(1), 107-119. <http://dx.doi.org/10.1016/j.cortex.2011.10.009>

Bonaventura et al. (2019). Investigating prismatic adaptation effects in handgrip strength and in plantar pressure in healthy subjects. *Gait & Posture*, 76, 264-269.

<https://doi.org/10.1016/j.gaitpost.2019.12.022>

Turziani et al. (2021). Improvement of phonemic fluency following leftward prism adaptation. *Scientific Reports*, 11:7313. <https://doi.org/10.1038/s41598-021-86625-0>

### **Pubblicazioni su MindLenses Professional o su parti del prodotto**

Oliveri, M., Bagnato, S., Rizzo, S., Imbornone, E., Giustiniani, A., Catania, A., Turziani, P. (2023). A novel digital approach for post-stroke cognitive deficits: a pilot study. *Restorative Neurology and Neuroscience*, Pre-press, 1-11. <https://doi.org/10.3233/RNN-231305>

Di Garbo, A., Chiaramonte, G., Giustiniani, A., Calistro, F., Ricotta, M., Imbornone, E., Rizzo, S., Bagnato, S. , Oliveri, M. (2022, September 15). Effects on attentional deficits of a device integrating digital rightward prism adaptation with serious games vs. standard rehab in right brain damaged patients: a randomized clinical trial.
